

Truss Designer – Relocation Bonus!!

Looking for an exciting career that's both challenging and rewarding? If so, Diamond Truss is the place for you!

Diamond Truss is a family owned and operated component manufacturing plant located in Ralston, WY, nestled in the mountains and surrounded by National parks. At Diamond Truss, we know the road to superior construction begins long before the first nail is hammered into place. And, as a leading supplier of framing components, we work (right from the start) to develop the perfect solution for each project.

Job Description:

We're looking for a Truss Designer that can generate and optimize clear, complete and accurate working plans and detail layout drawings based on architectural and engineering plans. Your plans will be used for the fabrication high quality roof and floor trusses.

Qualifications:

- Ability to read, analyze and interpret general mechanical/technical procedures and blueprints.
- Knowledge of truss production, code requirements, load design requirements and government regulations.
- Knowledge of equipment used in truss plant and how to produce efficient cutting.
- A working knowledge of Alpine or Mitek design software, familiarity with the Microsoft Office applications and other applicable wall panel design/engineering software.
- Ability to work with mathematical concepts (probability, fundamentals of plane and solid geometry/trigonometry).
- Ability to apply concepts such as fractions, percentages, ratios, and proportions to practical situations.
- Ability to define problems, collect data, establish facts and draw valid conclusions.
- Ability to effectively present information and respond to questions from internal and external customers.
- Associates Degree or equivalent, and 2-4 years related experience preferred.
- SBCA Truss Technician Training Level I or above.

Customer demand will dictate longer hours and/or working Saturdays if needed. Consent to drug testing required.
